Rekluse Core EXP

The all-new Rekluse Core EXP Clutch was designed from the ground up with the hard-core motocross and off-road racer in mind. When you hop aboard a bike that's equipped with the Core EXP, you'll immediately notice that your corner speeds increase, your starts improve, your fatigue decreases, and most importantly, your lap times improve.

Billet parts for superior durability and oil flow, consistent lever feel identical to stock, and reduced stalling. All these enhancements are yours when you install the revolutionary Rekluse Core EXP Clutch.

Options & Fitment

ALL 2-STROKE (Except 125) AND 4-STROKE MODELS 2001-2011

\$899.00

Rekluse Core Manual Clutch

Not just another CNC copy of stock clutch components, the Rekluse Core Manual Clutch is engineered from the ground up for maximum performance and durability. For more than six years Rekluse has been the recognized leader in after-market centrifugal clutch technology. Rekluse incorporated the engineering expertise developed making the best centrifugal clutch products available and applied this expertise to make the best stock-replacement manual clutch available.

Öhlins TTX Fork Inserts

FEATURES:

- Unique cartridge kit with TTX design.
- Gas pressurized damping system for immediate damping response.
- Easy installation in OE front forks.
- Compression damping. Rebound damping.
- Improved hydraulic stops to improve bottoming resistance.
- Springs are ordered separately to suit rider's choice of rate.
- New top-out rubber for smoother top-out feeling.
- Shock absorber delivered without spring.

Options & Fitment

Sachs 48MM		
Front Inserts	GG-175	\$1138.00
Springs	GG-176	\$135.00

\$1138.00

Öhlins TTX Shock

44mm Piston, Twintube & Gas pressurized type of shock absorber with external piggy back reservoir.

Compression Damping adjuster is located at the reservoir.

Damping is set with the knob, which have a normal right hand thread. By turning it clockwise the damping action is increased, and by turning it counter clockwise it is reduced. The knob have definite positions with noticeable "clicks", making it easy to set.

Shock absorber delivered without spring.

FMF Gnarly Pipe

Built to last, this aggressive pipe dishes out handfuls of torque and bottom to mid range pull needed for off road or motocross. The FMF Gnarly is everything the name implies with performance gains well focused towards bottom and mid power with the goal being increased tractability. This makes the Gnarly an excellent off-road pipe and superb for tighter mx tracks. Made of 18 Gauge steel.

Fitment

- 99-02 GasGas EC 200-300 GG-114 \$229.95
- 03-06 GasGas EC 250-300 GG-113 \$229.95

FMF Q Stealth

FMF has made it clear that they love 2-strokes, and we're backing it up by adding an all-new muffler design to our line-up. Don Emler headed up the Q-Stealth personally, because he loves to ride 2-strokes and is dedicated to reducing noise levels. The Q-Stealth is living proof FMF is the only exhaust company committed to bringing new technology to the 2-stroke enthusiast.

\$179.95

Fitment

07-11 GasGas 200-250-300 GG-112 \$179.95

FMF Turbine Core II Spark Arrestor

The Turbine FMF Core II is super-light and offers unrestricted flow while retaining its spark arrestor legal status. There isn't a better performing Spark Arrestor made. The Turbine Core II uses an internal "Turbine Dampening System" which kills spark and doesn't stomp on power all while keeping noise levels low!

Fitment

99-02 GasGas 200-250-300 GG-118 \$149.95

Scorpion Racing Radiator Guards

Nothing sucks more than fluids gushing out of your motorcycle in the middle of the bush miles from rescue just because of a poorly placed rock or tree and a little bad luck. Protect your radiator (and your bank balance) with a Scorpion Radiator Guard. The Scorpion Rad Guard will protect the front and side of your radiator against impact due to a crash or flying projectiles from the bike in front of you or brush that seems to want to spear your radiator. We created a staggered horizontal punch pattern that provides maximum airflow to reduce the possibility of overheating.

Fitment

ALL 2-STROKE (Except 125) AND 4-STROKE MODELS 2001-2011

PART # GG-1243

\$89.95

Scorpion Racing Radiator Frames

Do you want to protect your radiator without blocking the front and possibly reducing airflow? If yes then put a frame around it. The all-new Scorpion Radiator Frame, constructed out of 3/16" aluminum and 7/16" hex bar for the cross supports and yes you still get to run your stock radiator louvers for maximum airflow. This is the ultimate in side impact protection for your radiator.

Fitment

ALL 2-STROKE (Except 125) AND 4-STROKE MODELS 2001-2011

PART # GG-1529

\$94.95

Scorpion Racing HD Skid Plate

The all-new Scorpion Heavy Duty Skid Plate, in our opinion, is the best skid plate available on the market today. With a 3/16" thick aluminium construction, Hand Tig welded wings with a Scorpion logo carved into each side for bling factor, aluminium mounting brackets and high-grade metric fasteners, you simply can't go wrong. This is the perfect product for the hard core off road rider.

Renthal Ultralight™

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigors of Supercross, Motocross and Enduro.

The 7075 T6 aluminum alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life.

Renthal's combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.

Dirt Tricks Ironman Rear Sprocket

Dirt Tricks Sprockets are made of heat treated, nickel/chrome plated, chrome-molly steel that is 2.5 times stronger than stainless steel; 3 times stronger than 7075 aluminum.

A Dirt Tricks sprocket typically weighs 18 ounces verses 14 ounces for the same name-branded 7075 aluminum. That's a 4 ounce difference. Now compare that to an average of 30 to 40 ounces for a typical stainless steel or "Ti-Moly" sprocket and 25 to 30 ounces for a "Generation V".

1 Year Unconditional Warranty!!!

**Fits all GasGas 4-Stroke models of that year

EBC
BRAKES

EBC Front or Rear Brake Wave Rotor

EBC designs are made with heat treated carbon steel which is back tempered after hardening to an optimum hardness and toughness to provide durability but not to become brittle.

Over hardened rotors can crack when heavy braking occurs and the rotor is quickly cooled such as when crossing water.

Always use new pads when replacing rotors, the use of old or worn pads can cause hot spots or glazing of the rotor and will promote brake fade and loss of brake.

Options & Fitment

Front 01-11 GasGas*** GG-143 \$129.99

Rear 01-11 GasGas*** GG-142 \$129.99

\$129.99

Master Cylinder Cooler/Extension

No more worries of overheated brakes on your 05+ GasGas! This extension has been test proven to reduce overheating and allows for more brake fluid as well. Seven fins allow a greater amount of airflow to keep the expanded brake fluid from fading your riding day!

Options & Fitment

05+ GasGas GG-160 \$59.95

Fits all GasGas models and years from 05+, 2-stroke, 4-stroke

\$59.95

Galfer Front Brake Rotor

Galfer Wave Rotors offer the best in mud clearing along with the best feel and control while their design offers great cooling and reliability.

Laser cut from a unique high-carbon 420 stainless steel that has been pre-heat treated and parallel double disc ground to assure perfect flatness

Wave rotors will improve the lever feel and feedback allowing the rider to get a much stronger and progressive brake than other units would (added trailing edge on the brake pad surface)

Options & Fitment

01-11 GasGas All Models GG-140 \$165.00

Not recommended to change rotors and not pads.

\$165.00

Galfer Rear Brake Rotor

Galfer Wave Rotors offer the best in mud clearing along with the best feel and control while their design offers great cooling and reliability.

Laser cut from a unique high-carbon 420 stainless steel that has been pre-heat treated and parallel double disc ground to assure perfect flatness

Wave rotors will improve the lever feel and feedback allowing the rider to get a much stronger and progressive brake than other units would (added trailing edge on the brake pad surface)

Options & Fitment
